Supply Ability: 150 UNITS PER MONTH

Product Specification

• Weight:	45kg
Min Pcb Size:	10×10mm
Application:	BGA Rework And Repair
Power Consumption:	5200W
Power Supply:	AC 220V/110V
Tem Measuring Interface:	1pcs
• Feature:	Efficient
Advantage:	Low Weight
Highlight:	manual laser bga rework station, 5200w laser bga rework station, 5200w manual bga rework station

Product Description:

The Manual BGA Rework Station comes equipped with a Temperature Measuring Interface, which allows you to monitor the temperature at all times. This feature ensures that your work is always precise and accurate, and that you can achieve the desired results every time. The overall dimension of this product is 650*6500*610mm, making it compact and easy to store. The unit weighs 45kg, which is lightweight enough to move around your workspace, but heavy enough to remain stable during use.

Our Manual BGA Rework Station is built to last, and we stand by its quality with a 1-year warranty. This means that you can trust this product to perform well and deliver reliable results time and time again.

The power supply for this product is AC 220V/110V, which means that it can be used in a variety of settings and locations. Whether you are working in a professional workshop or a home garage, this product is suitable for your needs.

Invest in our Manual BGA Rework Station today and experience the benefits of precision temperature control and accurate

measurements. This product is perfect for anyone who needs to perform heating and rework tasks, and it is sure to become an essential tool in your arsenal.

Features:

Product Name: Manual BGA Rework Station Warranty: 1 Year Application: BGA Rework And Repair Overall Dimension: 650*6500*610mm Chip Size: Mini 1*1mm Advantage: Low Weight With Touch Screen Accurate Temperature Precision Temperature

Technical Parameters:

BGA Rework Station Type:	Soldering Station
Overall Dimension:	650*650*610mm
Weight:	45kg
Power Supply:	AC 220V/110V
Power Consumption:	5200W
Chip Size:	Mini 1*1mm
Min PCB Size:	10×10mm
Temperature Control:	PLC
Tem Measuring Interface:	1pcs
Infrared Preheating:	Yes
Warranty:	1 Year

Applications:

The WDS580 is perfect for reworking different types of PCBs, allowing businesses to save money on costly replacements. With its advanced temperature control system, which is managed by a PLC, businesses can be assured of accurate and consistent results each time they use the rework station.

The WDS580 can be used in a variety of different scenarios, including repairing and reworking BGA chips that measure as small as 1x1mm. This makes it ideal for use in small electronic devices such as mobile phones, laptops, and tablets.

One of the main advantages of the WDS580 is its low weight, which makes it easy to move around the workshop or factory. This is particularly useful for businesses that have limited space or need to move the rework station around to different workstations. The WDS580 is also backed by a 1-year warranty, giving businesses peace of mind that they are investing in a high-quality product that will last for years to come. Additionally, the WDS580 is made in China, ensuring that customers are getting a product that has been built to the highest standards.

In summary, the WDS580 is a manual BGA rework station that is perfect for businesses that need a portable, lightweight solution for repairing and reworking BGA chips. With its advanced temperature control system, businesses can be assured of accurate and consistent results each time they use the rework station.

Support and Services:

The Manual BGA Rework Station is a high-quality product that requires minimal maintenance. However, in the event that technical

support is needed, we offer the following services:

Telephone and email support for troubleshooting and technical inquiries.

Online resources such as user manuals, technical datasheets, and FAQs.

Repair and calibration services to ensure the product is functioning to its full potential.

Training services for new users to ensure proper operation and maintenance.

Our technical support team is dedicated to providing prompt and effective solutions to any issues that may arise with the Manual BGA Rework Station. Please do not hesitate to contact us for any assistance you may need.
