

WDS580 Professional Soldering Station with BGA Rework Station and Testing Interface

Our Product Introduction

for more products please visit us on bgaxraymachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: WDS
- Certification: CE
- Model Number: WDS580
- Minimum Order Quantity: 1 UNIT
- Packaging Details: Wooden case
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 150 UNITS PER MONTH

Product Specification

- Weight: 45kg
- Feature: Efficient
- Advantage: Low Weight
- Application: BGA Rework And Repair
- Chip Size: Mini 1*1mm
- Power Consumption: 5200W
- Overall Dimension: 650*6500*610mm
- Warranty: 1 Year
- Highlight: 5200w bga rework station,
5200w smd rework station

Product Description

Product Description:

Designed for ease of use and versatility, our Manual BGA Rework Station comes with a reliable warranty of 1 year. This ensures that you can work on your projects with peace of mind, knowing that you have a reliable tool at your disposal.

The temperature measuring interface included with this rework station allows for accurate temperature control, ensuring that your components are not damaged during the rework and repair process. This feature is especially important when working with delicate components that require precise temperature control.

With a compact overall dimension of 650*650*610mm, this BGA rework station is perfect for both professional and hobbyist use. It's easy to set up and operate, and its sleek design makes it a great addition to any workspace.

Whether you're desoldering, heating, or reballing, our Manual BGA Rework Station is the perfect tool for the job. With its advanced features and reliable warranty, it's the ideal choice for anyone looking to take their BGA rework and repair skills to the next level.

Features:

Product Name: Manual BGA Rework Station

Warranty: 1 Year

Overall Dimension: 650*650*610mm

Advantage: Low Weight

Type: Soldering Station

Feature: Efficient

Application: BGA rework station, PCB repair

Heating Method: Infrared preheating

Technical Parameters:

Weight	45kg
Min PCB Size	10×10mm
Application	BGA Rework and Repair
Type	Soldering Station
Temp Measuring Interface	1pcs
Chip Size	Mini 1*1mm
Power Consumption	5200W
Overall Dimension	650*650*610mm
Feature	Efficient with touch screen and precision temperature
Warranty	1 Year
Additional Feature	Allows for desoldering

Applications:

The WDS580 is a precision temperature-controlled rework station that enables you to accurately control the temperature of the soldering iron, hot air gun, and preheating table. This makes it an ideal tool for a variety of applications, including the removal and replacement of SMD components, the reflow of solder joints, and the repair of damaged PCBs.

The WDS580 is suitable for a wide range of product application occasions and scenarios. It can be used in the electronics manufacturing industry, where it can help to repair and rework PCBs in a precise and efficient manner. It can also be used in research and development laboratories, where it can help engineers and technicians to prototype and test new electronic products.

The WDS580 is also a great tool for hobbyists and DIY enthusiasts who want to repair or modify electronic devices at home. Whether you need to replace a damaged component on your smartphone or fix a broken circuit board on your computer, the WDS580 can help you achieve accurate and reliable results.

The preheating table is another key feature of the WDS580 that makes it an ideal tool for a variety of applications. The preheating table enables you to heat the PCB evenly and gradually, which helps to prevent damage to the components and the board itself. This is especially important when working with sensitive components that are prone to damage from high temperatures.

The WDS580 is powered by AC 220V/110V, which makes it compatible with most power supplies worldwide. Its overall dimension of 650*650*610mm makes it a compact and portable tool that can be easily moved from one location to another.

In conclusion, the WDS580 is a versatile and reliable manual BGA rework station that is suitable for a wide range of product application occasions and scenarios. Its precision temperature control, accurate temperature measurements, and preheating table make it an ideal tool for repairing and reworking PCBs in a precise and efficient manner. Whether you are an electronics manufacturing professional, a research and development engineer, or a hobbyist, the WDS580 can help you achieve accurate and reliable results.

Support and Services:

The Manual BGA Rework Station is a reliable and efficient tool for reworking Ball Grid Array components. Our product technical support and services include:

Expert technical assistance with setup, operation, and maintenance of the rework station

Comprehensive user manual with detailed instructions and troubleshooting tips

Access to online resources and FAQs

Regular software updates and firmware upgrades

Calibration and testing services to ensure accurate and consistent performance

Repair and replacement services for any defective parts or components

Training and certification programs for operators and technicians

Our team is dedicated to providing excellent customer service and support to ensure you get the most out of your BGA rework station.

Packing and Shipping:

Product Packaging:

1 Manual BGA Rework Station

1 Power Cord

1 User Manual

Shipping Information:

Shipping Weight: 70KG

Shipping Dimensions: 71 x 71 x 77 CM
